Projects

Pinterest– Mini FullStack Implemenation

pinterest-backend-nk.vercel.app

- Build a full-stack Pinterest-style platform using Node.js, Express.js, and MongoDB, implementing core functionalities including user authentication with passport.js, content management, and advanced search capabilities.
- Designed and deployed RESTful APIs for user registration, post viewing, board creation, and pin management, integrating Cloudinary for efficient image storage and EJS (Embedded JavaScript) for interactive server-side rendering of the user interface.
- Optimized database queries, image handling processes, and UI responsiveness, while implementing robust security measures and an intuitive search functionality to enhance user engagement, content discovery, and overall platform performance

VideoTube– A robust backend for a YouTube & twitter like platform

[View Source Code](#)

- Engineered a robust backend using ExpressJS and MongoDB, implementing user authentication, content management (videos, comments, tweets), and social interactions (likes) for a scalable social media platform.
- Engineered RESTful APIs for CRUD operations on user-generated content, optimizing database queries and ensuring efficient data handling for high-volume interactions.
- Designed and integrated a comprehensive dashboard controller to track user activities and engagements, providing valuable insights for platform growth and user retention strategies.

GetMeAChai – Fund your Projects with A chai

get-me-chai.vercel.app

- Developed a crowdfunding platform that enables developers, creators, and influencers to raise funds.
- Implemented a responsive user interface using Next.js and Tailwind CSS for a seamless user experience.
- Integrated Razorpay for secure and efficient payment processing.

MegaBlog – Your Personal Blog Site

mega-blog-nk.vercel.app

- Created a personal blog site featuring user authentication and personalized blog space.
- Utilized **React.js** for building interactive user interfaces, **AppWrite** for backend services, and **Tailwind CSS** for styling.
- Implemented user login and registration functionality, ensuring secure access to personalized content.
