Work Experience

- **Infoneo Technologies pvt. Ltd.** | MERN Stack Developer | January 2025 - Present
 - Contributed to **Board of Research in Nuclear Sciences (BRNS)** government project using React.js, Node.js, Express.js, PostgreSQL, and microservices.
 - Devised and integrated RESTful APIs for the admin portal, Enhanced database queries, and improved backend performance.
 - Designed and modified UI components to enhance usability and meet evolving project requirements.
 - Transitioned into backend ownership: created new APIs, updated existing ones, and improved response times under complex conditions
 - Built and deployed **BigCommerce** app extensions, including a custom application and assisted in deploying multiple apps.
 - Ensured scalable, maintainable codebase through best practices in debugging, testing, and version control.
- **ScaleEdge Solutions** | Frontend Integration and Node.js Developer | January 2024 – January 2025
 - Developed PMT (Project Management Time Tracker), an internal tool to monitor employee task hours using Node.js, Express.js, MySQL, and Handlebars (HBS).
 - Deployed and optimized backend APIs for accurate time tracking and seamless data storage/retrieval.
 - Formulated and maintained UI templates with HBS, ensuring clear visualization of task progress and reports.
- **Freelancing** | Remote
 - **Talentbuzz**: Instituted a talent hiring platform with React.js, GSAP, and Lenis, integrating Google Forms for streamlined submissions.
 - **Portfolio Website**: Devised a modern, responsive React.js + Tailwind CSS portfolio showcasing UI/UX designer's work with interactive animations.
 - **Jewills.com**: Created an e-commerce jewelry platform with PhonePe payment gateway, order tracking, and Accelerated performance (40% faster load times).

Projects

VideoTube– A robust backend for a YouTube & twitter like platform

[View Source Code](#)

- Engineered a scalable backend using Express.js and MongoDB, implementing users authentication, content management (videos, comments, tweets), and social interactions (likes) with optimized RESTful APIs for high-volume CRUD operations.
- Designed and integrated a dashboard controller to track user activities and engagements, offering insights for platform growth and user retention.
- Focused on efficient data handling and performance optimization to support platform scalability.

GetMeAChai – Fund your Projects with A chai

[View Live](#)

- Implemented a crowdfunding platform for developers, creators, and influencers with a responsive interface using Next.js and Tailwind CSS, supporting 740+ active users.
- Integrated Razorpay for secure payment processing, ensuring smooth transactions.
- Emphasized on delivering an efficient and seamless user experience across devices.
